FOREWORD

The Mississippi Statistical Abstract, 1981, is the thirteenth annual edition which has been published by the Division of Business Research, Mississippi State University. Prior to his resignation on August 5, 1981, Lambert W. Poor served as Assistant Editor; his primary responsibility was to revise the twelfth edition. Special acknowledgement is made to him for the excellent manner in which he fulfilled that responsibility: analyzing materials previously published in the *Abstract*, selecting new materials for publication, and making significant improvements throughout.

Upon his departure, many Division personnel shouldered additional responsibilities in order to continue the thirteenth edition. Special acknowledgement is also made to them: Peggy Zimmerman who prior to her retirement October 1, 1981, assisted at numerous points during the process, led a team of manuscript typists in preparing camera-ready copy for final publication, and served as liaison between the Division and Central Duplication and Supplies, Mississippi State University's Printing Department; and Dale Adams who in addition to serving as manuscript typist provided valuable counsel in getting the thirteenth edition into the hands of the printer. Other manuscript typists who must receive acknowledgement are Gina Hamburg and Diane Dendy. Both worked tirelessly toward final completion. I must thank especially, also, Janel Leavitt, Susan Pittman, and Guy Patterson who provided assistance with proofing throughout the revision.

On August 16, 1981, Sadia Al-Jibouri who has now completed requirements for the Doctor of Business Administration Degree, except the dissertation, became Assistant Editor to replace Lambert Poor. She assumed his responsibility and guided the thirteenth edition to final completion. She is commended for her fine performance.

The thirteenth edition contains the same sixteen sections found in previous editions, but efforts continued this year to improve the quality of its contents. Visual appeal has been retained by the inclusion of numerous maps and charts. Information contained in the thirteenth edition, like that in previous editions, represents the single most-varied compendium of statistics about Mississippi to be found anywhere. It is used by researchers, administrators, planners, historians, educators, politicians, and a host of others who maintain an interest in Mississippi and its sub-areas. Copies of early editions have been distributed in virtually every state in the Union and in a number of foreign countries.

Comments and suggestions for improvement of its contents and the manner in which they are presented are earnestly solicited. Just address your response to The Editor, *Mississippi Statistical Abstract*, Post Office Box 5288, Mississippi State, Mississippi 39762-5288.

TABLE 1.3 (cont'd)

Additional information regarding the climate of this State may be obtained by writing to the National Climatic Center, Federal Building, Asheville, N.C. 28801, or to any Weather Service Office near you. Additional precipitation data are contained in the "HOURLY PRECIPITATION DATA" for this State.

DIMENSIONAL UNITS: Unless otherwise indicated, dimensional units used in this table are: Temperature in °F, precipitation and evaporation in inches. *Monthly degree day totals are the sums of the negative departures of average daily temeratures from 65°F.*

OBSERVATION TIME: The Station Index shows observation times in local standard time. During the summer months some observers take the observations on daylight saving time. Snow on ground is at observation time for all except Weather Service Offices and FAA stations. For these stations snow on ground values are at 6:00 a.m., c.s.t.

SNOWFALL: Entries of snowfall in the table include snow and sleet. Entries of snow on ground include snow, sleet, and ice.

NORMALS for all stations are climatological standard normals based on the period 1941-1970.

DIVISIONS, as used in this table, became effective with data for January 1953.

STATION NAMES: Figures and letters following the station name, such as 12 SSW, indicate distance in miles and direction from the post office.

IN THE TABLE THE SYMBOLS AND LETTERS WHEN USED INDICATE THE FOLLOWING:

+	And also on an earlier date or dates.
D	Water equivalent of snowfall wholly or partly estimated, using a ratio 1 inch water equivalent to every 10 inches of new snowfall.
..	One or more days of record missing; if average value is entered, less than 10 days record is missing. Degree day data, if carried for this station, have been adjusted to represent the value for a full month.
R	Amounts from recording gage.
T	Trace, an amount too small to measure.

Stations appearing in the table with no data were either missing or received too late to be included in this table.

[1] Population counts for congressional districts are based on 1970 census complete-count data; housing unit counts are based on 1970 census sample data. These counts may not add to State totals because of post-1970 census corrections which were not assigned by congressionsl district and also because of sampling vaiability for housing unit counts.

3.0: HEALTH AND VITAL STATISTICS

The Statistical Services Division of the Mississippi State Board of Health has provided a wealth of data concerning births and deaths, marriages and divorces, and health matters.

Occurrence data were obtained from certificates filed in Mississippi at the place of the event. Residence data include transcripts of records of events that occurred in other states which involved Mississippi residents and exclude records filed in Mississippi which involved nonresidents.

Report on Institutions For the Aged or Infirm, a publication of the Mississippi Health Care Commission, provided data on institutions for the aged or infirm.

4.0: EDUCATION

The bulk of the data regarding Mississippi public education has been taken from Statistical Data, published by the Mississippi State Department of Education. Because private schools are playing an increasing role in the fabric of elementary and secondary education, available data regarding these indicators are also included.

Expenditures and receipts are published in the Annual Report of the State Superintendent of Public Education which also supplied information concerning teacher's salaries.

Comparative data for surrounding states have been taken from the Statistical Abstract of the United States, a Department of Commerce publication.

5.0: LABOR FORCE, EMPLOYMENT, AND EARNINGS

Labor force statistics for Mississippi are published monthly by the *Mississippi Employment Security Commission* in *Mississippi Labor Market, Monthly Review of Current Labor*. Annual data are found in the *Annual Supplement* to this publication which is published in March of each year.

Unemployed persons comprise all persons not working during the survey week who have made specific efforts to find a job within the past four weeks and who were available for work, and persons who were on layoff from a job or waiting to report to a wage or salary job within thirty days.

The bulk of employment data is found in Mississippi Covered Employment and Wages, published both quarterly and annually by the Mississippi Employment Security Commission. The employment and wages figures cover all full-time and part-time employees who were employed for the pay period which includes the twelfth of the month; consequently workers who were employed by more than one establishment during the period are counted more than once. Certain groups, notably agricultural workers, domestic servants in private homes, railroad employees, casual labor not in the usual course of an employing unit's trade or business and employees of religious or charitable institutions are not covered under the Mississippi Law.

The average earnings are "Gross," that is, they reflect not only changes in basic hourly and incentive wage rates, but also such factors as premium pay for overtime work and shift differentials. The workweek information relates to average hours worked or paid for and is somewhat different from scheduled hours because of such factors as absenteeism, labor turnover, part-time work, overtime work and stoppages. These series are prepared by the Mississippi Employment Security Commission in cooperation with the Bureau of Labor Statistics of the United States Department of Labor.

[1] See Table 5.14, Footnote 3, for explanation of Code.

[2] Where data for an individual establishment or reporting unit would not be divulged, monthly employment is given for industry divisions and for two-digit and three-digit groups. Criteria for non-disclosure of individual employer data are as follows: In cases where there are fewer than three establishments or reporting units in an industry division or group and in cases where there are three or more establishments or reporting units and one of these contains 80 per cent or more of the employment of the division or group, employment and wages data are combined and shown with data for other divisions or groups. Such data are included in county totals.

[3] The data for these industries are included in the NDC Classification Code that immediately follows the code numbers or the table with the corresponding first two digits.

[2] Where data for an individual establishment or reporting unit would not be divulged, monthly employment and quarterly wages are given for industry divisions and for two-digit and three-digit groups. Criteria for non-disclosure of individual employer data are as follows: In cases where there are fewer than three establishments or reporting units in an industry division or group and in cases where there are three or more establishments or reporting units and one of these contains 80 per cent or more of the employment of the division or group, employment and wages data are combined and shown with data for other divisions or groups. Such data are included in county totals.

[3] The data for these industries are included in the NDC classification code that immediately follows the code numbers in the table with the corresponding first two digits.

6.0: MANUFACTURING AND TRADE

Data on new and expanded industries were supplied by the Mississippi Agriculture and Industrial Board. Business births and deaths for enterprises covered by the Mississippi Employment Security law were found in Mississippi's Business Population, Births, Deaths, and Changes in Ownership, a publication of the Mississippi Employment Security Commission.

The annual Service Bulletin of the Mississippi State Tax Commission provided valuable data concerning trade for industry groups as well as municipalities and counties in the state.

9999[B]	Department of Defense controlled cargo and special category items

[A] Statistics on salt in this publication are included with "Nonmetallic minerals, except fuels, not elsewhere classified," commodity code 1499, to avoid disclosure of individual company operations.

[B] Cargoes exported on Department of Defense controlled vessels (other than goods for the use of U. S. Armed Forces abroad) and non-Department of Defense shipments of military component items (abbreviated SCi) for which commodity detail is not furnished to the Corps of Engineers.

[4] Coastwise receipts and shipments — these terms apply to domestic traffic receiving a carriage over the ocean or the Gulf of Mexico.

Internal receipts and shipments — these terms apply to traffic between ports or landings wherein the entire movement takes place on inland waterways. Also termed internal are inland movements that cross short stretches of open waters which link inland systems; marine products, sand and gravel taken directly from the beds of the oceans, the Gulf of Mexico and important arms thereof; and movements between offshore installations and inland waterways.

Local — movements of freight within the confines of a port whether the port has only one or several arms or channels, except car-ferry and general ferry, are termed "local".

8.0: COMMUNICATIONS AND PUBLIC UTILITIES

Much of the basic data concerning the communications industry in Mississippi can be found in directories which are prepared for each segment of the Industry. For example, newspaper data were found in a directory entitled Mississippi News Media published by South Central Bell, and the National Zip Code and Post Office Directory yielded data for post offices. Gas and electric data pertaining to the production and consumption of these energy sources came from the Statistical Year Book of the Electric Utility Industry.

Other general statistics not appearing in this section may be found in the U.S. Statistical Abstract which is published annually by the U. S. Department of Commerce.

9.0: BANKING, FINANCE, AND INSURANCE

The Annual Report of the Department of Bank Supervision, State of Mississippi, provides additions to the time series data of deposits for both State and National Banks in Mississippi. Other detailed banking information is found in publications of the Federal Deposit Insurance Corporation such as Assets, Liabilities, and Capital Accounts - Commercial and Mutual Savings Banks and Summary of Accounts and Deposits in All Commercial Banks, National Summary.

The Federal Reserve Bank of Atlanta publication, Historical Southeast Statistics, and unpublished data from the Department of Bank Supervision complete the banking series in this volume of the Abstract.

Savings and loan information concerning the number of associations and their assets comes from the Savings and Loan Fact Book.

The Life Insurance Fact Book is the source for series and comparative data of insurance activities in Mississippi and selected states. The Insurance Department of the State of Mississippi supplied unpublished data which completed this category.

The number of courts reporting to the Department of Public Welfare affects the total children's cases and consequently the comparability from year to year of youth court statistics. Courts from only four counties (Bolivar, Hinds, Pike, and Warren) have reported one or more cases for each year from 1946 through 1972. The size of the courts not reporting also influences the total cases.

Because of many limitations the trend table does not show the extent of delinquency or neglect in this state and may be particularly misleading if only total number of cases is used to make comparisons between years. The table is included, however, to show the increase in the total number of courts reporting youth court statistics to the Department of Public Welfare.

11.0: FOREST AND MINERAL PRODUCTS

Data concerning Mississippi Forest Resources are taken primarily from the Mississippi Forestry Commission's Annual Report and the U.S. Forest Service publication, Report of the Forest Service. Additional data was obtained from the Mississippi State Tax Commission's Annual Report of the Timber Severance Tax, and the Statistical Abstract of the United States.

The principal source of mineral data for Mississippi is The Mineral Industry of Mississippi, published by the U.S. Department of the Interior, Bureau of the Mines; Petroleum data is found in Energy Data Reports, which is also published by the Bureau of Mines.

Three figures have been added. Data contained in these figures were previously presented in table format. The figures are: (1) Foster Home Care Payments by County; (2) Total Food Stamp Value by County; and (3) Expenditures for Assistance Payments by County.

Also, two tables have been added. They are (1) Child Support Cases and Collections by County; and (2) General Relief, Number and Amount of Payments by County.

15.0: CONSTRUCTION AND HOUSING

The U. S. Statistical Abstract was the principal source of construction data. Information concerning mortgage loans was obtained from unpublished data from the Federal Home Loan Bank of Little Rock, Arkansas.

Because of the lack of municipalities which require building and construction permits, housing data are difficult to obtain for Mississippi. Other sources of potential data have also failed to yield adequate information.

16.0 AGRICULTURE

The United States Department of Agriculture is the leading source of agricultural statistics for the nation. Agricultural Statistics, its annual publication, is a comprehensive source of data on agricultural production, supplies, consumption, facilities, costs, and returns.

The bulk of the Mississippi data for current state agricultural activities comes from a number of detailed publications pertaining to agricultural statistics that are published by the USDA. These include Farm Income Statistics, State Farm Income Statistics, Field Crops: Production, Disposition and Value, Noncitrus Fruits and Nuts, Potatoes and Sweet Potatoes, and Vegetables.

Information on cattle is provided by the Wisconsin Agriculture Reporting Service, a cooperative function of the USDA, in its publication, Cattle Inventory. Other information on a variety of agricultural topics comes from Historical Southeastern Statistics, a publication published by the Federal Reserve Bank of Atlanta.

[2] Except for mohair, the livestock commodities include only State estimates of income for which the Department estimates value of marketing for 1977-79. All other estimates, while included in commodity group totals, are not listed separately but are combined as appropriate in "other livestock" to prevent disclosure of confidential data.

[3] Commodities do not add to group total because broilers, turkeys, and minor commodities--turkey eggs, ducks, geese, guineas and other poultry as estimated--are included in "other livestock" below in order to avoid disclosure of confidential data.

[4] Cash receipts include value of home consumption.

[5] Commodities do not add to group totals because broilers, turkeys, and mohair for certain States and other minor commodities such as bees, horses and mules, goats, goatmilk, mink and other pelts, rabbits, catfish, reindeer, and other livestock and products when reported are included for all States in "other livestock" below in order to avoid disclosure of confidential data.

[7] Except for rye, barley, corn, oats, sorghum grain, flaxseed, peanuts, soybeans, dry edible beans, dry field peas, potatoes, sweetpotatoes, citrus fruit, apples, apricots, avocados, cherries, dates, grapes, peaches, pears, plums and prunes, pecans, sugarcane syrup, alfalfa seed, fescue seed, crimson cloverseed, lespedeza, orchardgrass, red cloverseed, sweet cloverseed, timothy, vetch, popcorn, strawberries, forest products and greenhouse and nursery products, the commodities include only State estimates of income for which USDA estimates the value of production for 1977. Allowances are made in "other" categories for other States as all other estimates, while included in commodity group totals, are combined as appropriate in "Miscellaneous Vegetables," "Other Berries," "Other Fruits and Nuts," or "Other Field Crops" items.

[8] Includes vegetables produced in the State but for which USDA does not estimate individual values of production.

[9] Includes fruits and nuts produced in the State but for which USDA does not estimate individual values of production.

[10] Includes seed and other field crops produced in the State but for which USDA does not estimate individual values of production.
